

“SIX IDOLS - INTERVIEW WITH THE IDOLS” (HISUI NAGARE)

TRANSLATION: NARU-KUN / K-PROJECT WORLD

The virtual idol appears? Hidden in the darkness of the network, what is this group of virtual idols?

Recently, with the establishment of the Internet distribution service environment, idols' activities in virtual space are becoming popular. We heard that there was a virtual idol who was extremely popular despite not being identified, and we interviewed a person familiar with the matter.

If you want to describe it, the "super-organism" would be the closest. (H)

We interviewed two anonymous people, H and S. The identity is unknown due to the interview on the Internet, but the information is well established in the neighborhood.

--- Thank you for taking the time today.

H: It would be useful for us to share information about the external activities of "Notes". It is win-win.

S: Because you can't keep up with its range of action.

--- The virtual idol named "Notes" has a reputation for delivery time that exceeds common sense. We can ensure more than 20 hours of delivery time per day, there is also an opinion that it is run by several people.

S: Ah, it feels like it's far away even if it doesn't hit it. He is alone, but he can do a lot.

H: Yes. Also, Notes does not require a break, so he can spend a lot of time recording and editing videos. It sets he apart from other dealers.

--- In other words, does "Notes" mean a group of distributors?

S: Hmm... Speaking of which, is it a group?

H: If you want to describe it in existing terms, "super-organism" would be the closest. An intellect controls several individuals. It is also called "Mind of the hive".

--- Well, it's like science fiction.

H: No. As long as it is already a reality, it cannot be fiction.

My father is me. (H)

--- "Notes" is often posted on social media, but I've heard the conversation feels a bit unnatural.

S: That is correct. It cannot be helped. When I said I was talking, it was me, H or I is the same. I'm not used to talking to different people.

--- You mean you grew up in a complicated environment?

S: At first, it was isolated from the surroundings.

--- Isolated?!

H: Only a very limited number of people were able to contact us so that we did not get unnecessary information. I had contacted about four people when I started broadcasting.

--- That's... quite complicated. Being in that environment, what did you think of your parents?

H: He didn't seem to be dissatisfied with the environment, but I was trying to get rid of my parents.

S: I was really scared at the time. I'm serious. Me and H were about to die.

--- Wait a minute. In that way, H and S sound like relatives.

H: S was just involved. I am not a relative.

--- So is. No matter what, that kind of thing...

H: My father is me.

Because we like it. (S)

--- I feel like I caught a glimpse of a serious problem before he was a virtual idol. How do you think "Notes" will grow in the future?

H: It still has room for evolution. Currently, it is mainly delivered for a long time, but there is also demand for compact videos, so I would like you to acquire that knowledge. I am looking forward to it.

S: I'm not good at using SNS. I'll tell you to stop splashing rice quietly.

--- He was about to be killed, he's very kind...

S: Good. Because we like it.

H: Yes.
